Problem Statements	Ideas
1) Lack of platform to read and write editorials and to save algorithm and approaches for future refernces.	Becoming a freelance content writer for various websites and educate freshers
	Taking internships in companies and becoming a content editor and educator
	Making social media communites of college on various platforms like reddit, discord, etc.
	Making video lectures of solutions for beginners to explain solutions easily
2) Lack of platform where one can find the Editorials of recently concluded coding Competitions	Searching answer blogs on websites like stackoverflow, stack exchange, etc.
	Consulting seniors face to face to obtain solutions and approaches
	Conducting seminars and meetings to teach beginners how to approach competitive programming problems
3)Lack of platform where one can save their coding data for future references	Making a version control system for saving and organising data
	Saving data in local repository
